Wheel Pans

Axles

Wheelsets

Bogie Components

Drawgear Solutions

Axiom Rail is a company with an outstanding pedigree. Axiom Rail provides a fresh alternative for customers in rolling stock services including Maintenance, Refurbishment, Components and Suspension Systems.

Axiom Rail is a supplier of a range of highly adaptable maintenance solutions, operating throughout the United Kingdom.

Axiom Rail is a provider of maintenance packages for freight rolling stock. This scope includes maintenance provision and performance improvement.

## components

Axiom Rail offers a wide range of components to support the activities of its customer base. We are able to provide wheel sizes from 500mm dia to 1400mm dia and axles compliant with European Standards such as EN13261/2 and meet TSI requirements. With access to an annual capacity of up to 1,000,000 wheels and 500,000 axles, Axiom Rail is able to achieve stringent delivery requirements.

We offer fully assembled wheelsets covering a wide range of applications. All components are manufactured in accordance with the latest specifications and where applicable meet country specific requirements. Our manufacturers utilise the most advanced wheel and axle production techniques benefiting from computer controlled systems to manage all aspects of the production and manufacturing processes.

In support of the growing numbers of Axiom Rail suspension systems now in traffic, we are able to offer a fully flexible repair and maintenance service as well as individual new component supply.

### Wheel pans

- 1,000,000 production capacity
- 500mm dia to 1400mm dia
- TSI Approval
- DB HPQ Approval

### Axles

- 500,000 production capacity
- Standard or Broad Gauge sizes
- TSI Approval

### Wheelsets

- Compliant to EN13260
- TSI Approved
- Bearing and axlebox fitting available

### Freight Spares

- TF25, AMIII and TF25sa single axle
- Drawgear components
- Brake components
